SUMMARY

Business Solution System Analyst with experience in requirement gathering, system enhancement, and UAT coordination in the financial services industry. Strong background in translating business needs into functional specifications (BRD) and supporting system implementation. Equipped with technical foundation in SQL, system testing, and cross-functional collaboration.

EXPERIENCE

Prudential Life Assurance, South Jakarta

Apprenticeship Business Solution System Analyst

Feb 2026 - Present

- Contributed to requirement analysis and user story development for 7+ completed and ongoing insurance system enhancement projects.
- Contributed to investigation and validation of 3+ production issues to support system stability and business operations.
- Participated in User Acceptance Testing (UAT) activities including test execution, validation, defect tracking, and retesting.
- Utilized Postman, API testing, JSON debugging, and Life Asia to validate system integrations and troubleshoot insurance workflow issues.
- Collaborated with Business, IT, and QA teams to support process analysis, system documentation, and issue investigation.

Mandiri Utama Finance, South Jakarta

Software Quality Assurance Tester Intern

Feb 2025 – Feb 2026

- Executed System Integration Testing (SIT) and User Acceptance Testing (UAT) for 14+ projects and maintenance initiatives within the Joint Finance (JF) system.
- Developed and executed positive & negative test scenarios, transaction validation, and backend data verification using PL/SQL and PostgreSQL.
- Collaborated with Developers, Business Analysts, PMO, and IT Operations for defect tracking, retesting, and deployment validation using JIRA.
- Prepared test scripts, testing documentation, and UAT sign-off evidence to support production deployment.
- Tested financial workflows including disbursement, payment processing, repossession, restructuring, recovery, autowaive, and commercial financing processes.

EDUCATION

Bina Nusantara University, Jakarta

Bachelor of Information Systems — GPA 3.91 / 4.00

Specialization: Applied Databases (SQL, Data Modeling, System Development)

SMA Gembala Baik, Pontianak

Science Major — Average Score 84.24 / 100.00

PROJECT

Wave System Analysis Project

- Modeled system interactions using System Sequence Diagrams (SSD), Communication Diagrams, and CRC Cards
- Translated business processes into structured system design in Advanced System Analysis

FastFeast Food Ordering System

- Conducted requirement analysis, user story development, and system design for a mobile ordering system
- Designed user flow and UI/UX prototype to improve ordering efficiency and reduce operational errors

DistribuCare Application

- Designed system based on user stories and business requirements, improving distribution workflow from order to delivery
- Created UI/UX prototype to support system visualization and requirement validation

SKILLS

- **Technical Skills:** Business Analysis, Requirement Gathering (BRD), User Story Development, Process Modeling, UAT Coordination & Execution, SQL (Oracle, PostgreSQL), PL/SQL, API Testing (Postman), JIRA, Life Asia, IBM Content Manager, Figma, Lucidchart, Visual Paradigm, Tableau, Microsoft Office
- **Programming:** Java, Python
- **Languages:** Indonesian (Native), English (Advanced), Chinese (Beginner)
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Stakeholder Collaboration, Critical Thinking, Adaptability

CERTIFICATIONS

- Oracle-certified in database and application development with expertise in SQL, PL/SQL, and database design. Holds additional certifications in Tableau, HackerRank SQL, and the McKinsey Forward Program, demonstrating strengths in problem-solving, leadership, communication, and adaptability. Also certified in English and basic Chinese to support effective professional communication.
